## Strong partner with Know-how

For over 125 years, KÖBO has been a partner to the processing industry. Our proximity to customers gives us the opportunity to identify and solve problems in our customers daily business.

Due to our decades of experience, knowledge and industrial know-how, we can offer our partners and customers a wide range of technical support.

Our engineers can survey your projects on site and through a combination of measurements, analysis, discovering the essential features and understanding the technical process, we can propose the most suitable engineered solution.

Furthermore, through our co-operation and association to technical universities, our engineers can develop new solutions for conveyor chain applications.

KÖBO is certified to DIN 9001 and is a member of the German DIN standards committee.

## Easy Fit + Maintenance Free

The completely maintenance-free conveyor chain for the bulk industry with the quick replaceable roller.

# Everything from a single source

KÖBO is the tried and tested supplier to the bulk materials processing industry and is very familiar with the specific requirements relating to the transport of rough or fine-grained bulk goods through to the transport of goods with corrosive or abrasive properties.

You can trust the solutions that KÖBO offers.

Our chain expertise is in demand for:

- Bucket Elevator Chains
- Central Bucket Elevator Chains
- Plate Chains
- Reclaimer Chains
- Apron Conveyor Chains
- Roller and Guide Rollers
- Buckets
- Sprockets

Everything from a single source - just as you would expect from a professional manufacturer of engineering solutions.

KÖBO is certified to DIN 9001 and is a member of the German DIN standards committee

## Easy Fit makes it simple

The innovative, registered patent system for easier replacement of the rollers considerably reduces the effort, downtime and the respective costs for the replacement of rollers.

With our new development, the external roller can be detached from the carrier bolt and removed in one simple step. The new roller is pushed on until it locates on the carrier bolt, the roller is then secured to the carrier bolt automatically when the system is in operation.

Furthermore, we have developed a Joint Seal with SKF® that makes our chain maintenance-free. As a consequence of the maintenance-free chain, downtimes are reduced to an absolute minimum.

Easy Fit and Maintenance Free, the worry-free chain system from KÖBO.

# In many industries at home

Further industrial focus points of KÖBO's business worldwide:

- Food industry
  - Tunnel Ovens, Bottle Washer Machines, Sterilizer Machines etc.
- Steel industry
- Escalators & Moving Walkways for Shopping Centers, Department Stores and Supermarkets
- Escalators & Moving Walkways for Metros and Airports worldwide
- Automotive
- Recycling + Water Treatment
- Wood + Biomass
- Paper
- Amusement Parks
- Power Stations both Conventional and Nuclear
- Road Construction
- Lockgates and Barriers
